CURRENT LIST of MEDICAL LITERATURE

Medical Library

VOL. 1 August 27, 1941 No. 35

1. Anatomy, Embryology, Morphology
2. Anthropology, Ethnology
3. Bacteriology, Microbiology
4. Biology
5. Cancerology
6. Cardiology
7. Chemistry
8. Dentistry, Stomatology
9. Dietetics, Metabolism
10. Endocrinology
11. Gastroenterology
12. Genetics, Eugenics
13. Gynecology, Obstetrics
14. Histology, Cytology
15. Homeopathy, Osteopathy, etc.
16. Hospital Publications
17. Hygiene, Public Health, Sanitation
18. Immunology, Infectious Diseases
19. Industrial Medicine, Insurance
20. Jurisprudence, Criminology
21. Medical History
22. Medicine, Clinical, Internal
23. Medicine, Laboratory, Diagnosis
24. Medicine, Military and Naval
25. Medicine, Tropical
26. Medicine, Veterinary
27. Neurology, Neurosurgery
28. Ophthalmology, Optics
29. Otorhinolaryngology and Phoniatry
30. Parasitology, Entomology
31. Pathology (general)
32. Pediatrics, Child Welfare
33. Pharmacology, Pharmacy
34. Physiology
35. Psychiatry, Psychology
36. Radiology
37. Societies, Miscellaneous
38. Statistics
39. Surgery
40. Therapeutics
41. Tuberculosis
42. Urology
43. Venereology, Dermatology
44. Zoology

EXECUTIVE COMMITTEE OF THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

MICROFILM PRICES

In the many discussions and writings on the general subject of microfilm copying we seldom hear or see any well defined separation of mass microfilming from filming for research purposes. There is a great difference nevertheless, and this is important to bear in mind, especially when we consider costs to individuals.

Commercial filming is one thing, and filming for research purposes is another. Whole books, entire series of journals and pamphlets, the production of film libraries and special collections of film covering particular subjects are generally ordered by institutions or individuals who are prepared to foot the bills. Microfilm copying of journal articles for research is something else and there is an obligation on the part of the institution engaged in this work to keep the expense as low as possible. The question arises if it should not be done free of charge just as book loans are made free.

Those who raise their eyebrows at this should consider the cost of mailing heavy bound volumes, the damage done to the bindings, the necessity of going long distances to the library if the volume cannot be loaned. Add to this the expense of setting apart large spaces, with desks and so on, for readers who consult the books in person.

So if in place of all this we offer for our convenience as well as the readers, a microfilm, at least the charge should be kept low, the ordering should be simplified, and all frills should be eliminated. How quickly, how simply, and how cheaply can it be done should be the watchword.

Therefore, one should hesitate before concluding that those who use microfilm for scientific purposes should bear the cost of new and improved apparatus and embossed stationery.

H.W.J.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is $5.00 per year in the United States and $5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at $1.00 per year.
